

N4L's Cyber Tips

Help keep you & your school as cyber safe as possible

#1

Digital Citizenship

Ensure digital citizenship is embedded in the school to promote a safe digital culture.

#2

Password Management

Strengthening your login with complex passwords & multi-factor authentication are simple ways to protect you & your school from potential hackers.

#3

Antivirus

Make sure you use a reputable antivirus software solution & ensure your patches remain up to date.

#4

Firewall

It's a good idea to regularly review your Firewall rules to ensure they're correctly supporting & protecting your school community.

#5

Web Filtering

Interested in finding out more about your school's web filtering? Support Hub has a range of articles that can help.

#6

Email Scanning

Is your school using Office 365, G Suite or N4L's Email Filtering? Good news, your emails are already being filtered to stop threats. If you're unsure or want to know more, give us a call on **0800 LEARNING**

#7

Threat Response

Not sure who to contact when there's a cyber security breach or attack? We have a handy template to help you develop a plan, download from [here](#).

#8

Remote Access

Want to make sure your Remote Access is set up correctly? Check with your ICT provider for more info or take a look at our Training resources on Support Hub.

#9

Data Management

Ensuring your data is managed securely by regularly backing up is a good way to protect you & your school from cyber attacks.

#10

Review Process

With technology evolving & new security threats emerging all the time, it's important to review your ICT policies & procedures frequently.

If you'd like to know more about any of these tips or topics, call our Helpdesk team on **0800 LEARNING** or check out our **Support Hub** at n4l.co.nz/support
