

Help protect your school online

Access a suite of safety and security services designed to protect kaiako and ākonga

Internet Safety & Security Services - baseline protection

Internet Safety & Security Services make it simple for schools or kura to have a baseline level of online protection. It's a suite of five services with recommended settings, designed to help keep your ākonga safer and your network more secure.

Firewall

Web Filtering

DDoS Protection

DNS Threat Protection

SafeSearch

Recommended settings

As part of our Internet Safety & Security Services we also monitor the recommended settings to make sure nothing has changed with the firewall or filtering settings, and that DNS Threat Protection is switched on.

It's up to school leaders to decide the settings that best suit the needs of your school. To learn more about these settings head to n4l.co.nz/settings, or if you'd like to discuss your settings with us please get in touch.

Web Filtering

With all recommended categories & websites blocked

Firewall

With recommended settings applied

DNS Threat Protection
& SafeSearch

Enabled

Email Protection

For enhanced security to help protect schools and kura from the increasing number of email-based cyber threats, we offer an industry-leading inbound Email Protection solution. It's fully funded for eligible schools by the Ministry of Education and it works together with schools' existing Microsoft or Google email services:

247.2 million
Total inbound emails

149.9 million
Emails blocked by
Email Protection

94.3 million
Emails delivered
to school's service

School's settings
block further
emails

Safe emails
delivered to
school users

*Numbers above are based on emails received by users at ~1,500 schools over a single school term.

Cybersecurity services

We proactively monitor the network and will let you know if we discover any cybersecurity risks or issues at your school. We'll provide expert guidance on what you need to do to reduce the risk of any identified threats and vulnerabilities, and support you to identify and remediate cybersecurity incidents. Below is an illustration to explain some of the common cybersecurity terms you might hear from us about, and how our team helps in each scenario.

What more can I do to protect my school?

- ✓ Check your school is part of the Ministry of Education's [Risk Management Scheme](#). This includes cybersecurity insurance.
- ✓ Sign up to Email Protection. This is an additional layer of email security, which enhances your protection against spam and phishing attacks. It's fully funded by the Ministry of Education.
- ✓ Ensure our Internet Safety & Security Services [recommended settings](#) are enabled to provide a baseline level of protection. If you'd like to check your settings, please get in touch.
- ✓ Follow the [National Cyber Security Centre's advice](#) on other important steps you can take and critical controls you can implement in your day-to-day environment.
- ✓ Check out the [cybersecurity tips](#) from the Ministry of Education and N4L's [blog articles](#) for more information about our security controls and safety tools.
